We are not printing a perennial catalog this spring due to stable prices and a fine list of varieties. Our next catalog will be printed late summer. Although most plants have been increased in price, we are not increasing ours this spring. Our selection of perennials, we think, is up to date as far as good varieties are concerned. Our big pride is top quality and this is important. Every plant is field grown and is at least one year old making them high in quality.

If you have mislaid your copy of our 1953 Perennial Catalog and would like another copy, please drop us a request card.

Below is a list of new perennials which we are offering for the first time. Look it over and become acquainted with them, you will hear more about them soon.
